Full job description

- Join a rapidly growing company whos revenue has tripled in recent years
- Lead the Accounts Receivable team through a period of growth and transition

About Our Client

My client is a leading player in the Logistics Distribution and Supply Chain industry. They have been operating for 40+ years and have business across Australia.

They have experienced significant growth over the past 5 years, with revenues up by circa 300% in that time frame.

The business is ambitious, with further growth expected in the coming years and the structure in place to achieve this growth. They are seeking somebody with an innately curious nature, who always looks to improve, change and establish processes & procedures within the function. There are already areas identified to improve, but they are very willing and open to hear thoughts, suggestions and recommendations to improve.

Job Description

The role encompasses both business as usual work as well as significant driving of change within the team.

On a day to day basis, the Accounts Receivable Manager is responsible for the day to day running of the accounts receivable function through the overseeing and mentoring of the accounts receivable team. This role is also accountable for leading the team in in cash and debt collection through daily reconciliation of AR ledgers. On the change front, there are considerable areas of opportunity to drive performance, with process implementation and documentation, systems improvements and integration of acquired business.

Key duties include:

- Lead and direct the Accounts Receivable team to ensure day to day duties are completed in full and on time
- Ensure all Accounts Receivable responsibilities are carried out with appropriate internal controls by continually monitoring these processes and make improvements where necessary
- Provide leadership through effective goal setting, delegation and communication
- Create financial reports relating to Account Receivable function and status of accounts
- Report of key KPI's periodically to management
- Build and maintain strong working relationship with internal and external customers to ensure consistent service is provided
- Providing a professional support service to all internal and external stakeholders in line with the strategic goals of the Company

The Successful Applicant

The successful candidate will have a similar level of experience managing an Accounts Receivable function.

Ideally you will have come from a similar, or related industry - i.e. Transport, FMCG, Logistics Distribution and Supply Chain.

You will be able to demonstrate experience leading teams through a change process, improving the function.

You'll be able to commute to Eagle Farm on a regular basis.

What's on Offer

For this Accounts Receivable Manager role based in Eagle Farm, I have a competitive salary in the \$90,000 - \$110,000 range with some flexibility for the right person. There is also a bonus scheme in place.

This is a brilliant opportunity for an individual who enjoys making changes and implementing their own ideas in a function.

You'll be joining an ambitious, growing organisation with significant internal opportunities being made available. This role has arisen due to an internal promotion. If you have further questions, or if this sounds like it could be of interest, please feel free to apply, or reach out to me directly via email or

LinkedIn.
