### Full job description

#### Your new company

This bank is a well established and respected financial institution. Their Sydney CBD office offers a world-class working environment with state-of-the-art office facilities.

#### Your New Team

The Network Security Engineering team is responsible for delivering network security requirements and implementation to achieve business outcomes. The GTS Networks team is responsible delivering, supporting and continuously improving the Bank's Global Network and Security services.

#### Your new role

As a Senior Network Engineer, you will be in a consultant/design role designing all business portfolios; troubleshooting and resolving network and security

problems. You will author and maintain detailed network security design documents, ensuring accuracy and representation of firewall configuration and deployment of security policy. Your wider team consists of multiple squads in the Engineering disciplines of Network Security, Partner Connectivity, Workload Connectivity, Software Defined Network, Cloud Networking, Network Automation and Workforce Connectivity.

#### What you'll need to succeed

To be successful you should have experience with technology in a large organization, with relevant practice within IT Network and design or architecture area. It is essential for you to have Cisco switching and routing (CCNP or CCSP), F5 load balancer and AWS working knowledge.

#### What you'll get in return

- Working with leading technology
- A competitive salary
- Permanent position within Sydney CBD office
- Great culture and a flexible workplace

#### What you need to do now
